

♥ WINTER

Two Powerful Product Brands with a Long History of Serving High Rise Residential Buildings Come Together to Keep People and Infrastructure Safe From Harm and Enhance User Comfort.

Floor Heating

nVent NUHEAT electric floor heat is an easy-to-install zone heating solution. Ideal for any room, it may be installed under tile, stone, or laminate/engineered wood floors.

Instant Hot Water System

nVent RAYCHEM Hot Water Temperature Maintenance (HWAT) systems increase comfort and performance by keeping the hot water at the right temperature everywhere in the building, delivering instant hot water to the tap.

Pipe Freeze Protection

nVent RAYCHEM pipe freeze protection systems are modular, flexible, and easy to attach to the exterior of the pipe to keep pipes from freezing, bursting, or causing water damage.

Roof & Gutter De-Icing

nVent RAYCHEM roof and gutter de-icing systems protect roofs and gutters by ensuring a continuous path whereby melting ice and snow can drain safely to eliminate the risks of ice dams, heavy snow build-up, and icicles.

Surface Snow Melting

nVent RAYCHEM surface snow melting systems provide effective and reliable heating to surfaces for keeping walkways, parking garages, and ramps free of snow and ice to prevent slip hazards and vehicle accidents.

TOTAL CONTROL & MONITORING FOR HIGH RISE RESIDENTIAL HOUSING UNITS

nVent RAYCHEM ACS-30 is a multi-application centralized control and monitoring system with distributed control panels preconfigured for all commercial and residential building heating applications:

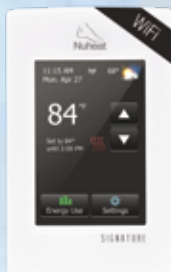

- Hot water temperature maintenance (HWAT)
- Pipe freeze protection
- Greasy waste and fuel flow maintenance
- Freezer frost heave prevention
- Floor heating
- Roof and gutter de-icing
- Surface snow melting

The ACS-30 features a centralized User Interface Terminal (UIT), which interfaces with up to 52 power & control modules (PCMs) distributed throughout the building at the required locations.

nVent NUHEAT SIGNATURE WiFi-Enable Thermostat

- North America's first WiFi-enabled thermostat
- Designed specifically for electric floor heating systems
- Homeowners can monitor, control, and program the floor heating system via free smartphone app (iOS and Android) or any web browser

INDUSTRY LEADING WARRANTY PROGRAM

Product quality is essential for your applications and installations. To answer your needs, we deliver products of the highest quality, available locally, worldwide.

Today, our "best-in-class" products come with unrivaled warranty coverage for complete peace-of-mind.

We are proud to offer an extended 10-Year product warranty for our nVent RAYCHEM heat trace cables.

We are proud to offer 25-years of warranty on our nVent NUHEAT Floor heating systems.
