

## CONNECT AND PROTECT

# RELY ON THE WINTER SAFETY EXPERTS

### ARE YOUR PROCESS INSTALLATIONS WINTER SAFE?

Your plant does not necessarily need to be in the extreme remote cold regions of the world to experience freezing temperatures. Conditions can easily drop below 32°F / 0°C overnight and put your process in jeopardy if your pipes are not properly insulated and heat traced.

### BE WINTER READY!

We have made it our specialty for over four decades to be winter safety experts. Professionals have come to rely on our nVent RAYCHEM Winter Safety Solutions.
