CONNECT AND PROTECT

RoHS - RESTRICTION OF HAZARDOUS SUBSTANCES

The nVent SCHROFF product line offers several product configurations to meet the requirements of the European Directive 2011/65/EU for Restriction of Hazardous Substances. This European Directive affects primarily the aluminum components that are finished with a gold chemical film process. This process uses a hexavalent chromium (Cr+6). An option for clear chemical film process using a trivalent chromium (Cr+3) has been added for those needing to meet this requirement.

The following chart is intended as a reference. Contact one of our applications engineers for more details regarding the RoHS requirements of specific items.

Series	Gold Chem Film	Clear Chemical Film	Black Anodized	Hard Black Anodized	Hard Black Anodized with Dry Film Lube	Nickel Plate	Electroless Nickel
